

NEW OFM SERIES - KIT-OFM-BX-25

Non-combustible electrical cable installation kit

The National Building Code now requires the use of non-combustible electrical cables (e.g.: AC90 [BX]) for projects requiring non-combustible construction.

Innovative kit, unique on the market: Ouellet Canada now offers an installation kit for BX cables for easier installation of its OFM series baseboard heaters.

Flexible installation: Can be installed at either end of the baseboard (junction box).

Reliability: The kit includes fast and reliable connections.

Increased productivity: Electricians can complete jobs more efficiently.

Available exclusively for Ouellet Canada's OFM series baseboard heaters, in boxes of 25 kits.

Replace baseboard wire holder with BX cable installation kit.
